

# THINK SPECIFICALLY: PARAMETERS

Lesson 9

**SIRI SAY, “BE SPECIFIC”**

**SIRI SAY, "BE SPECIFIC"**

# LET'S GET STARTED

- Name some functions.
- What are some questions someone might have in order to perform these functions?

# LET'S GET STARTED

- Name some functions.
- What are some questions someone might have in order to perform these functions?

# IMPORTANT VOCABULARY

**Parameter:** The ability to provide extra information for a function to do its work.

# IMPORTANT VOCABULARY

**Parameter:** The ability to provide extra information for a function to do its work.

# SIRI SAYS

1. In Pages, write 5 to 10 commands using parameters.  
The commands should be doable by our class.
2. Remember to change the font color to identify the  
function and parameter.

Use AirDrop to share your  
commands with me and  
let's play Siri Says!

Use AirDrop to share your  
commands with me and  
let's play Siri Says!

# LET'S DISCUSS

1. In each of these commands, were the function and parameter identified correctly?
2. How did adding parameters affect the command?
3. Was Siri Says more or less interesting with parameters?

# LET'S DISCUSS

# LET'S REFLECT

1. What parameters did you use in the app?
2. Why are parameters useful?
3. Are there functions that don't need parameters?
4. Think of an app you use everyday. Can you think of functions in the app that take parameters?

# LET'S REFLECT

# JOURNAL

1. Upload your commands from Siri Says.
2. Upload screenshots from Swift Playgrounds.
3. Record answers to these questions:
  - What is a parameter?  
(Use your own words.)
  - What do you know about thinking specifically?
